Q. How many Command cards do I draw at the end of my turn, when ordering my Storch with an **Air Sortie** card played alone and using the Storch Recon power?

A. None. A new Command card is not drawn to replace the **Air Sortie** card when played alone. If you want to benefit from the Storch's Recon power, you should order it using an applicable Command card - or an **Air Sortie** played along with a Section card.

Q. How many Command cards do I draw at the end of my turn, when ordering my Storch with a **Recon 1** card and using the Storch Recon power?

A. Two cards, not three. The Recon power of the Storch is not cumulative with the Recon power of the Command card itself.

Q. Can the Russian player under Commissar rules play an **Air Sortie** card that is face up next to his card holder along with a pre-programmed Section Command card?

A. Yes.

Q. Can the Russian player under Commissar rules play a Section Command card from the hand along with a pre-programmed **Air Sortie** card?

A. No. Note that the **Air Sortie** card is never pre-programmed; it is always face up, and never counts toward the pre-programmed limit.

Q. Can the Russian player under Commissar rules play a Section Command card from the hand along with an **Air Sortie** card that is face up next to his card holder?

A. Yes, as long as the Section card being played from his hand is a **Recon 1** Command card.

Q. How did you find out about Memoir '44? What convinced you to start playing the game?

A. I actually got into it by accident. I was looking online for a 'modular board' game and came across Battle Cry. My wife and I loved it and played it to the point of wearing it out. I'm a huge fan of World War II and was looking for something similar..just so happened at the time that Memoir '44 was about to come out. I pre-ordered it!
